The jewel in Ngorongoro's crown is a deep, volcanic crater, the largest un flooded and unbroken caldera in the world. About 20kms across, 600 meters deep and 300 sq kms in area, the Ngorongoro Crater is a breathtaking natural wonder. The Ngorongoro Crater is one of Africa's most famous sites and is said to have the highest density of wildlife in Africa. Sometimes described as an 'eighth wonder of the world', the Crater has achieved world renown, attracting an ever-increasing number of visitors each year. A packed lunch will be served en-route to the Serengeti. ### **Day-3 and 4 – Exploring Serengeti National Park.**

You will have two full days exploring the vast Serengeti National Park and its endless plains. Look for the Big Cats, Lion, Cheetah and the Leopard and lots of plains game. It is the migration for which Serengeti is perhaps most famous. Over a million wildebeest and about 200,000 zebras flow south from the northern hills to the southern plains for the short rains every October and November, and then swirl west and north after the long rains in April, May and June. So strong is the ancient instinct to move that no drought, gorge or crocodile infested river can hold them back.

The Wildebeest travel through a variety of parks, reserves and protected areas and through a variety of habitat. Join us to explore the different forms of vegetation and landscapes of the Serengeti ecosystem and meet some of their most fascinating inhabitants.
